ASM Eastern NY 2017 February Joint Dinner Meeting with AWS & ASNT @ Century House

RSVP by 3pm, Friday February 24th, 2017

When: Tuesday February 28th, 2017
    Social 5:30pm
    Dinner 6:00pm
    Technical Presentation 7:00pm
Location: Century House, 997 New Loudon Rd, Latham, NY 12110  (Phone: 518-785-0931)

Cost: $15 for student/retiree/professional/guest

Map:  https://goo.gl/maps/qb2aaUroZnR2

* Required

Technical Presentation, "Applying adaptive controls to complex production resistance welding applications to increase process consistency, reduce incidence of problem welds, reduce reliance on destructive testing, and increase manufacturing productivity"

About the speaker:
As founder and president of WeldComputer Corporation, Bob Cohen focuses on the development and commercialization of advanced monitoring and control techniques that continue to push the state of the art and quality assurance of the resistance welding process. His interest in resistance welding dates back to 1978 at General Electric's Corporate Research and Development Center, where he was involved in 2D axisymmetric transient thermal finite element modeling of the process. Bob was the inventor of the first commercially viable adaptive control, which was deployed in GE aircraft engine factories in the mid 1980's. His work on the AWS C1 and D17 Committees was instrumental in updating the Recommended Practices for Resistance Welding and MIL-SPEC to recognize monitoring and adaptive control as accepted alternatives to destructive testing.

Dinner is the Founder Buffet ($15)

Appetizer 1: Seasonal greens
Appetizer 2: Rolls with butter
Entree 1: Chicken parmesan
Entree 2: Beef tips maitre d' butter
Side 1: Rigatoni vodka
Side 1: Rigatoni vodka
Side 2: Seasonal vegetable
Dessert: Chocolate mousse with toppings bar
Beverage: Assorted soda
