About GE Transportation – Engine Systems

As a division of General Electric Company, GE Transportation is a global technology leader and supplier to the railroad, mining, marine, stationary power, drilling and energy storage industries. At GE Transportation, connectivity is the cornerstone of our innovative technology that helps our customers solve their toughest challenges. We deliver breakthrough efficiencies through our brilliant, connected machines; use advanced manufacturing techniques that bring our innovative concepts to life more efficiently and cost-effectively, and deliver on our promise of speed to move them faster to market.

GE Transportation Engine Systems Latham Site owns 66,000 Sq. ft. manufacturing facility, including the state of the art Turbo Testing Facility. The plant has 62 employees, 8 major product lines, and miscellaneous part sales. Products include over 100 different models of turbocharger covering both internal and external clutch units and basic 5 turbo families.
Attention to Tour Participants:

- The tour will start promptly at 5:30 in order to complete in the time scheduled. If you are late, you will not be admitted once the tour has progressed to the interior of the facility. Please allow adequate travel time and verify your directions.
- You will need to show ID at security and check in for a site visitor badge.
- Safety glasses are required, and safety shoes are recommended to tour production areas. Please bring safety glass and wear safety shoes if possible. Additional safety glasses will be provided with limited quantity.
